

## "Aunt Lucia" Staged by Local Talent Sensational Success

Fine Demonstration of Community Enterprise and Co-Operation in Two Nights Performances—Sidney Short Stars as Principal Character

"Aunt Lucia" enlivened Coleman on Monday and Tuesday and left pleasant memories among all who took part and those who witnessed the show.

Even to those who in two short weeks experienced the "agony" of rehearsals, and who worked faithfully under the direction of Miss Marie Schmitt, of the Universal Producing Co., the results were such as to give gratification.

The consensus of opinion of all who attended was that it eclipsed all other shows held here.

Opening with the baby pageant, with dramatic readings by Miss Martha Houston, an interesting scene was unfolded as the curtain rose on the stage filled with little children grouped as if ready for slumberland.

Following in rapid succession was the opening ensemble of "Aunt Lucia's" glee club, in which many men around town and members of the main cast were grouped, and with the sprightly young girls' chorus, a typical collegiate setting was given to the commencement of the play, with choruses and yells for Bulla Bulla college.

Then—on with the play, as the many difficult situations of Jerry Watson, the college student man quering as "Aunt Lucia," create embarrassment to himself and his chums and hilarious amusement for the audience. Portrayed splendidly by Mr. Sidney Short, the character of "Aunt Lucia" is the pivot on which the play centres, and unintended credit is due to this gentleman for his triumph as an amateur actor.

Professor Gaddis (Arthur E. Graham) of the dignified college faculty, completely deceived by Jerry as "Aunt Lucia," becomes so infatuated that he forsakes his friend, Dean Howard, (Mrs. Rippon) to court the favorable consideration of "Lucia," while Collins, played by F. G. Creagan, and the big Buttr and Egg Man, (Major Barnes) also are rivals for the hand of "Lucia." Collins becomes so infatuated that he poses with dramatic effect and tells how he will pluck a pine tree from Norway, dip it in Mount Vesuvius, and emblazon across the sky the words—"Lucia, I love you."

The college students, Dick and George, were well played by A. B. McIntock and Arthur Kirkby, while Betsy, Mollie and Ethelyn, sweethearts of the students and Jerry, were splendidly represented by Miss Edith Hayson, Miss Hilda Clifford and Miss Kathleen Milley. The president of the college, Dr. Seamore, and his wife were taken by Mr. H. T. Halliwell and Miss Bessie L. Dunlop. The freshmen, F. W. Guerdar and Bert Stevenson, though making their initial appearance behind the footlights, played their comedy parts exceptionally well, and Tom Holstead as fraternity president gave just the right touch as head of the boys.

With Melville Cornett cheer leader, J. A. Fairbairn as glee club president, and Oliver Salvador as messenger boy, the cast was complete.

The flapper chorus, with well-known men masquerading as typical flappers, showed originality and strikingly humorous ingenuity in their costumes. While hesitating to single out individuals for special mention, it is hard to resist commenting on "Andy" Olive as the Campus Flirt, Reuben Johnson as

the Perfect 56, Steve Kleyko as Baby Face, Henry Tibergien as the Gold digger, and Joe Spivak as Innocent Freshman. George Vincent as Conceited Junior and Tony DeCocco as Teacher's Pet were a good pair from the high school. To all others in the flapper chorus praise is due, and the climax of their appearance was the "Dance of the Seven Veils," which almost convulsed the house with laughter.

The girls' chorus, dressed in natty sailor costumes, sang very prettily in the special dance numbers "Breezing Along," the haunting melody of which still rings through the mind; the flashlight number "Me and the Man in the Moon," and the closing chorus in the main play, "Say It Again." Marie Olson played the pianoforte accompaniments throughout the show very efficiently, and the overture was played by Willfrid Mason's orchestra. Little Florina DeCocco's novelty dance number proved highly popular and drew an encore each night.

At the close of Tuesday evening's performance just before the drop of the curtain, Miss Marie Schmitt, organizer and director of the play, was introduced to the house, and received a hearty round of applause from the cast and the audience for the results of her untiring efforts of her two weeks stay here. Acknowledgement was also made by H. T. Halliwell of the co-operation extended by all who had taken part in the show, and for the support of the general public in attending.

### Film Facts

Maurice Chevalier, sometimes known as the world's leading entertainer, is a Frenchman. He fought for his native land in the world war, and the world has fought its way into theatres to see him in talking movies ever since he joined the ranks of Paramount at Hollywood. See him in "The Love Parade" showing at the Palace theatre this week-end.

Ben Turpin, famous cross-eyed comedian, came out of retirement to play in one scene of "The Love Parade," the Paramount all talking, all-singing feature.

### ST. ALBAN'S CHURCH

Next Sunday is the 14th after Trinity. The services will be as follows:

11 a.m. Holy Communion, and Sermon.

2:30 p.m. Sunday School.

The regular Vestry meeting will be held in the Parish Hall on Monday, Sept. 22, at 8 p.m.

### The Salvation Army

Sunday, 11 a.m. Holiness Meeting. 2 p.m. Directory Class for the young people. 2:30 p.m. Company Meeting. 7 p.m. Salvation Meeting.

Officers in charge: Wm. Slous, Capt., and J. Wiseman, Lieut.

Acknowledgment is made to W. Dutil, Coleman Hardware Co., for the use of the attractive furnishings in the stage setting of "Aunt Lucia." Also to the K. of P. and United Church for loan of chairs for seating accommodation in the Opera house.

## The Navy Looks Her Over

Expert criticism of the Canadian Pacific's new 26,000-ton liner, "Empress of Japan," is depicted in the above picture, which shows two British Blue Jackets gazing at the graceful trans-Pacific greyhound, lying at her berth in Vancouver, B.C. The new

White Empress, which broke all records on her first voyage, by steaming from Yokohama to Vancouver in 8 days, 5 hours and 27 minutes, will make Honolulu a regular port-of-call on her voyages to the Orient.

## To All Who Took Part in "Aunt Lucia" ---Many Thanks!

As chairman of the committee responsible for the production by entirely local talent of the collegiate comedy, "Aunt Lucia," I take this opportunity of expressing my thanks and appreciation of their generous help and to state how gratifying it is to share with them the satisfaction of having "put it over" so successfully.

I trust everyone will take this as a personal message of thanks, for it is impossible to see each one individually, or to single any out for special mention, but I feel that to Mr. Sidney Short and the supporting cast is due very great credit for the two weeks of grinding rehearsals to which they so kindly gave their time.

To all others who, though not appearing behind the spectacular glare of the footlights, helped in various ways, thanks also is expressed.

H. T. Halliwell, for St. Alban's Vestry.

## Local News

The law firm of Gillis & Lynch-Staunton has been dissolved, J. E. Gillis, B. A., continuing the practice here alone.—Enterprise.

Mrs. Allan Carswell of Lundbreck, left on Sunday evening for Scotland for a visit and will return with her daughter Jean in November.

The Pythian sisters announce a bazaar and sale of work on Thursday, Oct. 23, with a whist drive and dance in the evening.

More paint is being applied to Main street buildings. This time it is the Burns Co. meat market. Who's next?

Sid Short is nursing a sprained wrist caused by falling during a stage performance on Monday evening.

Erio Bergquist was here on Tuesday from Proctor, B.C., and his visit was made the occasion for a gathering of the clans, to renew acquaintance with old friends. He states he is getting along splendidly.

## Local News

Miss Marie Schmitt left this morning for Kirkland, near Seattle. During her two weeks stay she made many friends, who wish her every success in her work.

On Sunday and Monday a number from town were hunting in the district between Waterton and Pincher, but very few ducks are reported to have been shot.

A very enjoyable evening was spent at the whist drive and dance held in the K. of P. hall on Sat., Sept. 13, the prize winners being: Mrs. L. Caroe, Mrs. Wm. Wilson, Mr. R. Anderson, Mr. W. Cousins. After lunch everyone enjoyed dancing to the splendid music played by Mrs. Salt's 3-piece orchestra.

Packing them in at \$2 on Broadway. See and hear "The Love Parade," with dashing, daring, debonair Maurice Chevalier.

## Local News

Students Mildred Higginbotham and Lena Godfrey have received word from the Department of Education that their paper on Composition 2 (Grade X) have, on appeal, been passed. This adds two names to the list of students completing a full year's work at the June examinations of 1930.

Inspector and Mrs. Bremner, of Macleod, and Miss Carmichael and Miss Young, of Hillcrest, were visitors at Mrs. Clifford's on Thursday last.

### Notice!

Merchants who on Sept. 10 or 11 were interviewed by a Mr. G. F. Bouchat, relative to a series of articles which he promised to have published, are requested to advise The Journal office at once, and to state the amounts for which he issued receipts.

## WORLD HAPPENINGS BRIEFLY TOLD

It is reported that Bernt Balchen, Norwegian flier who participated in the Byrd South Polar expedition, is planning a round the world flight.

Erasmus G. Pearce, 60, vice-president and general manager of the Sherbrooke Daily Record, died at his home following a short illness.

Dieudonne Coste has been made an honorary colonel and Maurice Belonte an honorary lieutenant in the Mexican air force on suggestion of the ministry of war.

Believed to be the oldest telephone operator in point of service in the United States, Miss Elizabeth Good, of St. Paul, Minn., has retired. She served subscribers 50 years.

Canada's term as a member of the Council of the League of Nations, has terminated. Sir Robert Borden, the Dominion's delegate, will now participate only in meetings of the assembly.

High praise was given to the equipment of Canadian soldiers by Dr. F. J. H. Coultas, tuberculosis specialist of England, who sailed from Montreal on the Canadian Pacific liner "Montclair" for Southampton.

It is understood that officials of the British Empire Trade Exhibition were planning to ask the six ministries to send the dirigible R-101 or the R-100 to Buenos Aires, next March, for the exhibition there.

With a pledge given by the Latin bloc, which controls 10 votes in the assembly, to support Ireland, it comes practically certain that the Irish Free State will succeed Canada on the council of the League of Nations.

Economic loss to the Dominion through unemployment is \$10,000,000 a month, Mayor H. W. Carter, of Brandon, Man., president of the United States Municipalities, stated at the opening of the 30th annual convention of that body at Hamilton.

Communist forces in China attacked British and United States gunboats. No fatalities were reported, though it was stated that the British boat's retaliation was the "heaviest attack against Chinese outlaws in recent years." It is thought that some members of the Red parties may have been killed.

## PAIN

No matter how severe, you can always have immediate relief:

## GOVERNMENT GRAIN INSPECTION

We are indebted to the Searle Grain Co., Ltd., Winnipeg, for the following article describing the system of Government Grain Inspection as carried on under the supervision of the Board of Grain Commissioners: The Dominion Government Grain Inspection Department is under supervision of the Board of Grain Commissioners, but the direct responsibility for the actual grading is placed upon the Chief Inspector for Canada and his deputies. These men are efficient, of high integrity and have had many years of experience.

The necessary qualities of a Grain Inspector are sound judgment, accuracy and a thorough knowledge of grain, as well as a general knowledge of the many different varieties and their respective milling values.

A good light is essential to grading. The Inspection Department always uses a north light so there is no glare from the sun, and a north light is always steady. The actual grading is never done later than 4:30 in the afternoon, thus utilizing the light while it is at its best.

After the samples are taken from the railway cars as described in our pamphlet "Government Grain Sampling," and have been delivered to the Grain Inspector's office, the first step in grading is weighing the samples to ascertain the test weight per measured bushel. Then the dockage is determined by weighing 500 grams (approximately a pound) of grain, sieving it and weighing the refuse or "dockage" which has been screened through the official standard sieves for that purpose. The test weight and dockage are recorded on the cardboard ticket contained in each sample bag. The Inspector then grades the cleaned grain, placing grade and dockage on the "Inspector's Sheet," making notations regarding the quality, test weight and the load lines of the car. The samples are then checked and passed on by the Supervisors as to accuracy of grade, and thus double checked.

The inspection sheets are two in number, a larger and smaller. The larger sheet shows the full details, viz., car numbers, station shipped from, destination, and to whom cars are consigned; the smaller carbon copy sheet, called the "Inspector's Sample box showing samples as they arrive from the car," only bears the car number and the minimum standard identity.

Inspector does not know where the car he is grading is from or who owns it; each individual sample is graded on its own merits. After the Deputy Inspector has graded a sheet the larger and smaller sheets are put together by the clerical staff, grades are filled in, checked, and from the larger sheet the Inspection Certificates are made up. Each day copies of the inspection papers are sent to the Government Grain Inspection offices at terminal unloading points to be used for binning purposes.

The most important of the mechanical aids used by the Inspectors are sieves, mill out separators, scales and moisture testers. The sieves used for cleaning wheat are the No. 10 wire sieve and the No. 5 zinc buckwheat sieve. A Cowan dockage tester is used for separating wild oats and an Emerson dockage tester is used in the case of durum wheat. A No. 9 wire sieve is used for cleaning barley. For flax, two sieves are used; the top sieve is a 3 by 6 wire sieve, while the bottom sieve is of zinc with 41/64 round perforations. The principal scale used is a 500 gram scale which gives percentage readings in dockage tests. An imperial quart kettle is used for determining the test weight per measured bushel. The moisture tester (Brown-Duval type), is the most intricate of these and is operated as follows: 100 grams of wheat are put into a glass flask with 150cc. of oil. (The oil prevents the wheat from burning.) A thermometer and a tight fitting rubber cork are inserted in the top of the flask and from the side of the flask a spout which fits into a glass condensing tube submerged in a tank of running cold water. Underneath the condensing tube is a graduated glass cylinder into which the moisture condensed from the grain falls. When the thermometer registers the prescribed temperature of 180 degrees the heat is turned off, moisture tester allowed to cool, and the percentage of moisture in the graduated glass cylinder is recorded.

Before each Deputy Inspector are minimum standard samples of the different grades which are for his guidance. These standard samples are made up each fall for the new crop as early as possible by the "Western Grain Standards Committee." This Committee is made up as follows: One member representative, four representatives of the Producers of Alberta, five from Saskatchewan, three from Manitoba, one from British Columbia, the

Board of Grain Commissioners, the Chief Grain Inspector, the Chairman of the Grain Appeal Tribunal and the Chief Dominion Cerealists, making a total of twenty members. If a shipper is dissatisfied with the grade placed on his car he has two recourses to register protest; first he can call for a reinspection of the unload sample for which there is no charge. If the grade is not raised and he is still dissatisfied, he can have the unload sample placed before the Grain Appeal Tribunal, whose decision is final. The fee for an appeal is \$3.00. If the grade is raised the fee is returned, and if the Inspector's grade is sustained the fee is forfeited.

Appeal Boards in the Western Division are situated at Winnipeg, Calgary and Edmonton. Each Board consists of eight members, including the Chairman, who is an independent subject official, and an Appeal Board or Tribunal consists of the Chairman and two other members, one of such members to be a representative of the Producers.

The Western Inspection Division is all territory from the Pacific Coast to the Head of the Lakes. In this territory are several inspection points, namely, Port William, Port Arthur, Winnipeg, Moose Jaw, Saskatoon, Calgary, Edmonton, Medicine Hat, Prince Rupert and Vancouver. Approximately 130 inspectors are employed under the Chief Inspector.

There is also a large research laboratory in connection with the Inspection Department at Winnipeg. Its duties are to determine the milling and baking qualities of wheat and also to make protein and moisture tests as well as general research work for the guidance of the Western Grain Standards Committee and the Inspection Department.

Our management pays careful attention to the grading of all cars consigned to our advice. The inspection certificate is compared with advice from the shipper as to grade anticipated, the official Government sample of the cars is carefully examined in the Inspector's office and the shipper's instructions are carried out. Whenever we consider any better grade obtainable by a re-inspection it is ordered on the unload sample and if necessary we ask for an appeal.

### New Device Demonstrated

Music Produced From Instrument Based On Radio Principles

By merely moving his hands before a plain looking cabinet, Lenington H. Shevell, a national broadcasting artist, created music of such amazing tone and beauty that radio engineers from all over America, who heard him, applauded enthusiastically.

It was the first public demonstration in Toronto of the Victor Therenin, a musical instrument based on radio principles, which had been brought here for the annual banquet at the King Edward Hotel held in connection with the fifth annual and the first international convention of the Institute of Radio Engineers.

The music of the instrument had been heard by many before on national hook-ups over the air, but more novel than the actual music was the simplicity with which the young artist seemed to produce it. Standing before a silver rod which extended above a plain wooden box, Mr. Shevell merely moved his hands back and forth to bring out the tones he desired. His right hand was used to bring out the melody, he explained later, and with his left hand he controlled volume, phrasing and expression.

The Therenin is named after its

creator, a Russian, who conceived the idea that in the "squeals" of radios was sound that could be utilized as music.

A study looking into causes of street car and bus traffic accidents showed that more than 20 per cent. of the street car and bus operators are "prone-to-accident" men.

### An Aviation Mecca

Canada Is World's Best Testing Ground For Aeroplanes

Canada is the world's best testing ground for aeroplanes, as they are given year-round use under varying conditions on wheels, on floats and on skis, said Ernest Robinson, vice-president of the Fairchild Aviation Corporation, in opening the new Canadian factory and aeroplane and seaplane base at Longueville, Que. The new plant, which was constructed to turn out Fairchild planes for Canadian use, is expected to turn out about 150 Fairchild planes a year.

A philosopher of the fourteenth century has left it on record that "Most men have three characters—that which they do exhibit, that which they have, and that which they think they have."

The Atlas moth, a night flying insect of Central America, is one of the largest insects in the world. Its wings measure 14 inches from tip to tip.

A new dress material is said to be made from steel. Artificial teeth for moths will be the next thing.

## SUNDAY SCHOOL LESSON

SEPTEMBER 21

### JONAH—THE NARROW NATION-ALIST REBUD

Golden Text: "Of a truth I perceive that God is no respecter of persons; but in every nation he that feareth Him, and doeth righteousness, is acceptable to Him."—Acts 10:34, 35. Lesson: Read the Book of Jonah. Devotional Reading: Psalm 139: 7-12.

#### Explanations and Comments

Jonah's Disobedience, chapters 1 and 2.—"Whenever we are conscious of an urgent voice which says to us, over and over, 'You ought! You ought!' it is likely that we are listening to the word of the Lord. It was thus that the word of the Lord came to Jonah telling him that he ought to go to Nineveh, that great city, and preach there the message that God bore him. Instead of obeying the voice, Jonah went in the opposite direction, the story tells us. At Joppa he found a ship bound for Tarshish (the Phoenician colony on the southern coast of Spain, then regarded as the very end of the earth), and went aboard it. A violent storm arose, and the sailors concluded that some one had offended his god, and they cast lots to discover the culprit. The lot fell upon Jonah, who acknowledged his guilt, and advised them to throw him into the sea. Finding the effort to row back to land unavailing, the sailors prayed to Jehovah and then reluctantly cast Jonah overboard. The sea ceased from its raging, and the sailors offered sacrifice to Jehovah. A great fish swallowed Jonah, and after three days cast him out upon dry land.

The Prophet Rebuked, 4:8-11.—Still unwilling to believe in divine mercy, Jonah erected a booth for himself east of Nineveh and set under its shade to see what would become of the city. The booth was constructed of branches whose leaves withered, but a gourd sprang up and its living leaves afforded him grateful shelter.

The gourd was eaten by a worm, and it withered, and then the astro from the desert of burning sand blew over him, and he found himself, prayed that he might die. "It is better for me to die than to live," again his pride as a prophet was hurt, and he was indignant that "heaven Ninivites" should receive mercy from Israel's God. When Job was overwhelmed with afflictions, and was told by his wife to "Rebunounce God and die," he answered, "What? Shall we receive good at the hand of God, and shall we not receive evil?"

"I never knew until I got a car," said the bishop, "that profanity was so prevalent."

"Do you hear much of it on the road?"

"Why," replied the bishop, "nearly everybody I bump into swears dreadfully."

A goodly number of water-fowl areas have been reserved as sanctuaries in the western provinces, where so many of Canada's ducks breed.

"I never knew until I got a car," said the bishop, "that profanity was so prevalent."

"Do you hear much of it on the road?"

"Why," replied the bishop, "nearly everybody I bump into swears dreadfully."

## How To Lose 24 Pounds of Fat

At the Same Time Gain in Physical Vigor and Youthfulness and Swiftly Possess a Clear Skin and Vivacious Eyes that Sparkle with Health.

Here's the recipe that banishes fat and brings into blossom all the natural attractiveness of that every woman possesses.

Every morning take one-half teaspoon of Knudsen Salts in a glass of hot water before breakfast.

Be sure and do this every morning for—It's the daily dose that takes off the fat.—Don't miss a morning. Knudsen daily means that every particle of poisonous waste matter and harmful acids and gases are expelled from the system. Modify your diet, and take gentle exercise. The stomach, liver, kidneys and bowels are the tune's wigs and the pure fresh blood containing these six salts is carried to every part of the body, and this is followed by "last of all" the "last of all" of energetic health and activity that is reflected in bright eyes, clear skin, cheerful vivacity and charming figure.

### Not Cramped For Space

Accommodation On R-100 More Commodious Than On Trains

When the British air liner R-100 was over Ottawa, it was difficult to realize that the ship's interior was actually over 150 tons. In length R-100 is larger than any of the ocean liners that sail out of Montreal. The alldrome to house R-100 would have to be larger than any city block in Ottawa.

Passengers on the air liner have cabins as commodious as the cabins on ocean liners. They are larger than the compartments in Pullman sleeping cars. There is more room on the promenade decks of R-100 than in the observation cars of transcontinental trains. The dining saloon will accommodate more passengers than will the dining car of any train.

Under construction, when the long steel girders of the airship were to be seen, it conveyed an impression of strength much like the appearance of an ocean liner in the shipyard.

Long before R-100 has reached the present age of the British liner "Mauretania," first class passenger travel will be almost entirely by air.

### Royal Winter Fair

The Royal Winter Fair at Toronto this year will be held from November 19th to November 27th, both dates inclusive. The association has recently opened new and larger offices in the Reford Building, the change being made necessary by the expanding business of the association.

## NOTES AND COMMENTS

The willing horse pulls the heaviest on the load. The sluggish hangs back in the traces. So it is in everyday life among human beings. Most people are willing to take all the benefits that may accrue from the efforts of others in their behalf, but when it comes to making a little sacrifice of time which they could easily afford, something very important has to be done. A very large percentage of people need driving to get them to do anything. Persuasion or polite requests are of little avail.

The attitude is that the world owes them a living, instead of their realizing they have to put forth persistent effort if their own progress is to be assured. And this applies collectively as well as individually.

Manual labor in all lines of industry has decreased. So has the ability to do hard work—at least it seems so! No body would wish to return to those so called "good old days". They would have to work too hard. Mechanization of industry, motor transport and other progressive factors have to some extent lessened the capacity or ability for hard work and persistent effort, with the result that we find many trying to enjoy all the luxuries and benefits of an advanced civilization without making a corresponding effort to earn them.

The individual who is of real value in a community is he who will gladly share the responsibility of whatever work may be necessary. It may be unpleasant sometimes, but if we only permit ourselves to do the pleasant things in life, then we will be on the downward grade. Life is real, and life is earnest, which many do not realize. They drift along with the thought smouldering in the far recesses of their brains that they will muddle along somehow, and maybe things will come out alright. Gunpowder is needed to awaken some indolent people.

The United States has tried Prohibition, and it is a dismal failure. Canada tried it, and was glad to adopt a system of government control on the sale of intoxicants. Again the advocates of a "bone dry" country are becoming busy in Alberta. We applaud their persistence, but after reviewing Canada's experiences, and those of the United States, we conclude that the legislation they would enforce is ahead of the mind and will of the people. It is absolutely true that you cannot govern without the consent of the governed. That is why Prohibition is ineffective across the border.

How many parents have read the review of school examinations as published in this paper during the past two or three weeks? Many may have scanned it over and turned aside because it was dry reading; others may have been intensely interested to identify themselves with the information contained therein. It is a great help to students if parents evince keen interest in their children's course of studies, even though they may not know as much as the children. A responsibility rests on parents as well as teachers. Don't lay the blame for your own neglect on the shoulders of teachers if children are not making the progress that you think they should. Some of the blame may lie within the home.

People often under-estimate their powers of accomplishment. Two weeks ago a young lady arrived in town, organized groups of people ranging in ages from five to fifty, and put on a show which surprised those who wondered how it could be done.

It is a demonstration of tact and leadership. With the exception of those whose previous experience was a great help, the greater number had never taken part in a musical show, yet they were able to furnish entertainment which acted as a tonic to the community, and provided a degree of pleasure to those taking part.

With motor coaches now operating through the Cross Nest Pass to Cranbrook, and a possible extension to Spokane, and with the inauguration of the air mail service over the Rockies next year, activity will be quickened in Coleman. It needs lots of it to put more life into things generally. Coleman business men should bestir themselves to improve their service in every way possible. Efforts are being made to have this town scheduled as a stopping place for meals for the motor coaches, and also the Board of Trade is ambitious in trying to have this made a point for air mail pick-up and delivery. The way to get these things is to use every effort to secure them. They will not come by sitting down and wishing for them.

It is pleasing to note that International Coal Co. is embarking on a publicity campaign. It means valuable publicity not only for the coal company but for the town as a whole.

Public Sale  
of Land

Department of  
Municipal Affairs

Take notice that under The Tax Recovery Act, 1929, the following lands will be offered for sale by public auction, to be held in the Opera House, Blairmore, Alberta, on Tuesday, September 30th, 1930, at ten o'clock in the forenoon.

Approximate acreage is shown opposite to each parcel.

### And Now—The Quebec Festival!

Habitant artists, born and bred on the soil of the Province of Quebec, and celebrated artists from cosmopolitan centres of culture will rival one another in recovering the spirit of old France and old New France at the Quebec Festival of French-Canadian Folk-Songs and Handicrafts, which, the Canadian Pacific Railway announces, will be held on October 16, 17 and 18 this year, with headquarters at the Chateau Frontenac.

Among the many delicacies which will be served at this annual banquet of French and French-Canadian culture, will be two ballet operas, "A French-Canadian Wedding" and "The Order of Good Cheer," the first depicting a joyous country ceremony of a hundred years ago, and the second being a page from the history of Champlain's first

settlement at Port Royal in Acadia, in the early years of the seventeenth century.

The charming folk-songs of old Quebec, of the "voyageurs" and the "coureurs du bois" of the backwoods, will be sung by the famous Bytown Troubadours; groups of Quebec and Montreal children will perform traditional country dances of old French provinces and of Quebec; and a hundred other entertainments of a varied and delightful nature will be provided by noted artists of the Gallic race from Canada and other countries as well during the three days of the Festival; while there will be constant exhibitions of handicraft work with spinning-wheel and loom by Quebec women, whose tapestries and clothes are famous and sought for all the world over.

thetic staff and principal may feel, the time-table cannot be adjusted to meet the situation without affecting adversely the majority of the students.

4. The student is now in his third year. He is more mature, is developing a definite ambition, his parents are becoming more insistent that he 'catch up'. He (and the staff) do all that can be done in the time available, but the result is seldom anything but failure—it is safe in fact to say 'Never'.

5. A fourth year is inevitable. The handicaps are still present, probably the situation is even worse and the attempt to clean up the final five or even only four units does not result in the expected success. And even if the twenty-one units are cleared the student would have surely done better to proceed at a steady five units each year with six in the third or fourth; the work would have been easier and most of the worry and extra work avoided.

Here is a typical case—that of a student of average ability who entered the high school four years ago and wishes to enter Normal (twenty-one units required.)

First Year	Attempted..7	Passed..5
Second Year	Attempted..8	Passed..6
Third Year	Attempted..7	Passed..5
Fourth Year	Attempted..7	Passed..3

This student's fourth year work

was distributed over the time tables of the first three classes, the subjects required could not be 'fitted in' and the final result was never in doubt. The results for the three years show that this student has the ability to carry five units but because she persisted in the attempt to carry seven or more she will need five years to complete the three year Normal Course.

Another Case—A student attending high school for the fourth year and wishing to complete the three year course requires five units that are distributed over the first three years. The time table enables her to work in the full five periods (one each day) in one of her subjects only but she cannot fit in more than half the lessons in any one of the other four. Of course she has ample time at her disposal; she can cover the program and win out? School records say "very unlikely" and experience says the same. Yet she passed sixteen units in three years. Average ability is indicated but she has persisted in carrying too heavy a load.

The remedy is entirely in the hands of student and parent. The Department (perhaps wisely) places no limit on the choice of subjects the student may write at the June examinations and when the stu-

### General Analysis of Examination Results, June 1930

(Continued from last week)

The results for the second year group have been analysed in detail because I wish to call special attention to the position of the "repeater" student. Those interested in the progress of our students and the success of our high school, parents in particular, are asked to give careful consideration to the following:

1. The student who succeeds in five only of the first year units (Grade IX) belongs evidently to the "average" group and should be content to proceed at average speed, attempting only five or at most six units in the second year. To do otherwise is to invite disaster as will be shown.

2. The student repeating two units and attempting to 'catch up' is laboring under a double handicap. In the first place the task is probably, almost certainly, beyond his ability; in the second place, because of the type of organization necessary in a small high school where three teachers are teaching full programs to four classes, it is not possible for that student to attend all periods in the subjects he desires.

3. School records for the five years past show that this student will almost certainly fail in one or more of the first year (repeated) subjects and also in one or more of the second year units; carrying over to the third year some first year work, some second and having some (new) third year work. The school time-table cannot now meet his needs; no matter how sym-

### Economic Unity Of The Empire

Within a few days the Imperial Economic Conference will be convened in London, England, and representatives of the British Government will sit down at the conference with representatives of the self-governing Dominions and discuss matters of mutual concern to all members of the British Commonwealth of Nations.

It will be a momentous, an epoch-making event in the history of the Empire. There have been Imperial Conferences in the past, but they have had to do with constitutional and political aspects of our Empire relationships. For the first time serious consideration is to be given to the economics, the trade and commerce of the Empire as a unit, and to the future lines of policy to be followed by each British nation in its trade relations with the Motherland and the other Dominions on the one hand, and with the rest of the world on the other hand.

The Conference, therefore, will make history, and exert a profound influence on the future of each of the self-governing Dominions, the British Isles, the widely-scattered British colonies, in a word, the whole Empire, while at the same time its decisions will inevitably create a reaction in, and affect the policies of all other nations. A nation can no longer live unto itself alone. The adoption of any given policy by one of the major nations of the world in the present advanced state of our world civilization affects all other nations. They must take cognizance of it and govern themselves accordingly. And if this is true of the action of any one nation, it is immeasurably more true of a great union of nations comprising one-quarter of the earth's surface and more than one-quarter of the world's population.

The forthcoming Imperial Economic Conference is fraught, therefore, with great good or ill for the Empire. Today while politically and sentimentally one, it is divided economically, each individual self-governing unit treating each other in matters of trade much the same as they do foreign countries, and each coping singly with great economic problems which through joint action they might be able to solve.

The first question for the approaching Conference to consider and decide is: Shall this condition continue? Can it continue with safety to the future of the Empire? The Empire was created by conquest and built up by trade. The day has passed when Great Britain can dominate the trade of the world. Entirely new world conditions have developed, particularly during and since the Great War. As a result Britain has lost much of her world trade and economic and financial predominance. The whole world has become industrialized. Single handed Britain cannot hope to regain her lost leadership in trade and commerce, but cannot she do so in co-operation with the Dominions? Will political and sentimental ties hold the Empire together if its component parts are bitter rivals in trade, giving advantages to foreign countries, regardless of the welfare of sister British nations, solely because it seems beneficial to the individual units to do so?

These are matters for the consideration not only of Britain but for all of the Dominions as well. They transcend party politics everywhere. It is the future of the Empire that is at stake.

Assuming the Imperial Economic Conference to be that such a condition cannot continue; that they must unite upon economic lines as well as upon political lines; the next step is to find common ground of action. Admittedly it is in connection with the working out of details of policy that definite, concrete problems of opposing and conflicting interests will arise. They cannot all be solved at once, but a very real start can be made along lines of least resistance, leaving the future, in the light of actual experience, to further extend and develop the agreed upon policy as circumstances may dictate to be of mutual advantage.

A recent newspaper despatch from Ottawa intimated that the West was not greatly interested in the outcome of the Imperial Economic Conference. No greater misconception could possibly exist. The West is vitally interested. To a greater extent, perhaps, than any other part of Canada, its future is wrapped up in a successful outcome to the approaching deliberations in London. In no part of the Empire will the people evince a greater interest, possibly even anxiety, than on the prairies of this Dominion.

#### Making Sure Of Good Seed

The Ontario Department of Agriculture is taking time by the forelock in so far as making preparation for the World's Grain Exhibition and Conference, at Regina, in 1932, is concerned. Farmers are being urged by the department to keep this year's seed in the event of the crop of next year not being up to the high standard of former years.

Despite the cold and long sunless periods in the Arctic Zone, about 2,000 specimens of plant life have been discovered there, among them willows, junipers, ferns, mosses and numerous flowering plants.

Inhale Minard's Liniment for Asthma.

Caravans of camels passing through Afghanistan sometimes number 120,000 laden beasts.

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude herbs. Use what your doctor would advise. The best help is Phillips' Milk of Magnesia. It has remained standard with physicians for 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal again with excess acid in the crude ways. Go learn—now—why this method is superior.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

#### Self-Cracking Nuts

British Scientist Makes Important Announcement

Here's comfort for the people who have a hard time in extracting the meat from the proverbial stubborn nut.

Dr. A. W. Hill, of the botanical research station at Kew, England, told the British Association for the Advancement of Science, that it was at last possible to produce self-cracking nuts.

"This is a valuable achievement in a commercial sense," Dr. Hill remarked. "For instance, in California pistachio nuts have been commercially valuable owing to the cost of cracking them."

The botanical expert also recorded research achievement in the case of lines which had a useful habit of shedding the fruit when it was ripe, thus enabling the collection of lines on the ground. Botanists, he said, were now striving to produce banana immune from disease and curving inward on a bunch. This new curve, if brought about, would enable the fruit to be handled more easily and to take up less room on board ship.

## Do You Value Your Health?

If your health is poor; if you are pale, nervous and easily tired; if you suffer from headaches and backaches; if your digestion is bad and you depend upon it that these symptoms come from an impoverished state of the blood. Then unless a complete remedy is remedied a complete breakdown may follow. Dr. Williams' Pink Pills is a perfect remedy for this condition. They enrich and purify the blood and thus promote health and strength.

Mrs. G. M. Andrews, Halifax, N.S., writes:—"I always kept Dr. Williams' Pink Pills in the house. When I was a young, anemic girl they completely restored my health. After marriage my health broke down and once more these pills brought me back to health. My friends all tell me how well I look and for this Dr. Williams' Pink Pills deserve a credit. You can get these pills at all medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont."

#### Useful To Motorist

Recent Invention Shows Driver When Headlight Not Burning

It is often difficult and sometimes impossible to tell from the driver's seat whether both headlamps are lighted. Dr. W. Kennedy Fenton, Toronto, has invented a simple, yet effective and attractive little gadget that is readily attachable to headlamps and constantly reminds the driver whether the lamps are lit or not. They are small reflectors in various designs which fasten to the headlight rims. They are luminous at night and visible from the driver's seat.

Asthma Is Torture. No one who hasn't gasped for breath in the power of asthma knows what such suffering is. Thousands do know, however, from experience how immeasurable is the relief provided by that marvelous preparation, Dr. J. D. Kellogg's Asthma Remedy. For years it has been relieving the most severe cases. If you are a sufferer do not delay a day in securing this remedy from your druggist.

Predicts Speedy "Flying Sub"

Will Cruise Eight Miles Above Earth Says Edward Warner

"Flying submarines," to cruise at 250 miles an hour eight miles above the earth, were predicted by Edward B. Warner, president of the Society of Automotive Engineers.

Cruising speeds of 100 to 250 miles an hour were sufficient for present needs, he declared, except in certain parts of the west and north, where travellers wish to fly 1,500 miles between dawn and sunset. When more speed is demanded the "submarine" and the "rocket plane," long a dream of Glen Curtiss, would be developed, Warner said.

Africa Interested In Grain Show Evidence that competitive exhibits from far off Transvaal, South Africa, will be received for entry in the World's Grain Exhibition and Conference at Regina, 1932, is found in request to the office of the exhibition for a number of tags for attaching to exhibits. The Hartheestport Experiment Station at Brits, Transvaal, is also anxious to receive special information regarding the exhibition of corn.

The greatest mistake we can make in life, is continually to be fearing that we shall make one. Never explain. Your friends do not say it, and your enemies will not believe you.

Use Minard's Liniment for Foot Ailments.

W. N. U. 1865

### POKE PAIN

Ends in 1 Minute

"Racked with pain and pain of place in stomach with South-Side," writes H. T. Carr, "Poke Pain stopped. Place in stomach is now clear and digestion. Get instant relief today. All druggists."

#### Piracy On High Seas

Pirates Cause Plenty Of Trouble Along Coast Of China

Guns for duty on the high seas as a precaution against piracy are in great demand in Far Eastern ports due to the recent announcement of the British Government that it will take the places of the soldiers. The anti-piracy brigades will be under command of non-commissioned officers of the British army.

British soldiers were placed on British vessels about three years ago at a time when the pirates were specializing in sea-going vessels. In one raid alone several Britishers were killed and the pirates made off with a score or more of hostages and \$50,000 in specie. For centuries piracy has been rife along the south coast of China. It is still in this region that the pirates have their headquarters. Their lair is in the notorious Bias Bay, 50 miles north-east of Hong Kong, where there are rugged mainland hills in the background to which the robbers withdraw when sought by armed forces from the waterfront.

Master minds work out details of the robbery of the larger ships. In general, the pirates are three to four months have been devoted by the pirate chiefs to arranging details of a single haul, which when successful, pays most handsomely. To cope with this situation, the British shipping Graves have been compelled to spend much money and at the same time perfect a system designed to reduce the chances of piracy to a minimum.

Specialists have been engaged and a new form of gunnery has gradually developed in this part of the world. He must not only be handy with a revolver but with a rifle as well, and all officers of ships plying these waters must be well versed in the handling of fire arms.

Worms sap the strength and undermine the vitality of children. Strengthen them by using Mother's Own Worm Expeller to drive out the parasites.

#### Latest Electrical Appliances

Light Can Now Be Blown Out Like a Match

Old jokes about lazy folks who work merely by drawing their breath has become the latest reality of scientific developments to reduce man's physical toil.

An electric light which can be blown out with the same small puff that extinguishes a match was placed on exhibition at the Westinghouse Lighting Institute, New York.

Its secret is a new kind of electric switch, the "breath relay," for which is promised many useful applications. It can be set to turn either on or off.

Persian Balm is a sheer delight to use. Cools and relieves irritations caused by weather conditions. Imparts a rare charm and beauty to the complexion. Fragrant and velvety smooth. Never leaves a vestige of stickiness. Swiftly absorbed by the tissues and stimulates the skin. Persian Balm is the peerless toilet requisite. Every woman will appreciate the subtly distinctive charm achieved by the use of this magical lotion.

A musical slot machine has been invented in England which vends cocktails properly iced and scientifically blended.

A Household Medicine.—They that are acquainted with the sterling properties of Dr. Thomas' Electric Oil in the treatment of many ailments would not be without it in the house. It is truly a household medicine and is as effective in dealing with many ordinary complaints it is an inexpensive medicine. So, keep it at hand as the call for it may come most unexpectedly.

Patron—Let's have some ginger ale.

Waiter—Pale?

Patron—No, just a glass will do.

#### Hay Fever

and catarrh are offensive ailments. Heat and inhale Minard's Hay Fever remedy, as for colds. It stimulates and relieves the membrane.

### MINARD'S "KING OF PAIN" LINIMENT

#### Rural School Supervision

New Plan Of Rural School Improvement Instituted In Saskatchewan

Announcement was made recently by Premier J. T. M. Anderson, Minister of Education, of the appointment of the first rural school supervisor for Saskatchewan, under the new plan of rural school improvement being put into effect by the Department of Education.

Miss Mary Isabella Grant, of Cabri, Sask., is the first supervisor to be appointed by the Public Service Commission and will assume her duties immediately in the new experimental supervisory school area in the neighborhood of Kindersley and Glidden, Sask.

The appointment of rural supervisors, according to the premier, is being made in accordance with numerous requests from school trustees and ratepayers throughout the province who wish to co-operate with the Department of Education in a plan to provide closer supervision of rural school education.

The Minister of Education believes that the experiment will do much towards solving the many problems of Saskatchewan's rural school education.

Is it usually safe to say that when a child is pale, sickly, peevish and restless, the cause is worms. These parasites range the stomach and the digestion, causing serious disorders of the digestion and preventing the infant from deriving sustenance from food. Miller's Worm Powders, by destroying the worms, correct these faults of the digestion and serve to restore the organs to healthy action.

#### Honeymooners Take To Air

Journey By Train Or Ship Is Considered Old-Fashioned

Honeymooners by anything so common-place as a train or ship are now "digitally" old-fashioned says the London Daily Mail. A journey to Paris by air is the only fitting beginning of a modern wedding tour. A Croydon official says that honeymoon couples are departing and arriving almost daily. Brides are arriving from church still in their wedding gowns and veils, blushing as they are pelted with confetti while boarding a plane, which is usually decorated with flowers, but nobody has yet attempted to tie a lucky shoe to the tailskid.

#### Farms In New York City

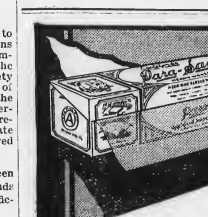

As unbelievable as it sounds, there are 320 farms within the confines of New York City. This metropolis devoted to industry and money-making, houses 320 farms in Queensborough, 66 in Staten Island and four in Brooklyn. They are all truck farms.

#### Her Three Children

Troubled With Diarrhoea

Mrs. Leo Lapointe, Lanier, Man., writes:—"My three youngest children were very bad with diarrhoea. I tried all kinds of remedies, until a kind old lady told me to try Dr. Fowler's Extract of Wild Strawberry. I got a bottle right away and started giving it to them, and the next day the diarrhoea had stopped altogether. Now I will know what to do when any of my children are troubled that way again."

On the market for the past 85 years; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

#### Cut Down Food Wastage

---by covering all perishable goods with Para-Sani Heavy Waxed Paper. Para-Sani moisture-proof texture will keep them fresh until you are ready to use them.

You'll find the Para-Sani sanitary knife-edged carton handy. Or use "Centre Pull" Packs in sheet form for less exacting uses. At grocers, druggists, stationers.

Western Representatives: HUNTER-MARTIN & CO., REGINA, SASK.

## CONTRACTS LET FOR ELEVATOR AT PORT CHURCHILL

Ottawa, Ont.—Important contracts in connection with the power equipment for the 2,500,000-bushel elevator of the Department of Railways and Canals is contracting at Churchill, have been announced. The announcement came from Hon. R. J. Manion, minister of that department.

The boiler-house equipment will be supplied and installed by Babcock, Wilcox & Gault, Limited, of Galt, Ont., and the generator room equipment by the C. A. Parsons Company, Limited, of Toronto, Ont., and Newcasoan-on-Tyne, England. The expenditure represented by these contracts will amount to about \$550,000.

Good progress is being made with the work of developing a port at Churchill, and the construction program laid down in the winter of 1927-28 has not only been maintained but, in certain respects, exceeded.

The program contemplated sufficient work and facilities to permit of testing out of the route during the fall season of 1931. It provided for the completion of 600 feet of deep water dock by the end of the present season, the tidal use of the harbor during the entire season of 1932, and complete use of the port by the end of that season. Efforts have been made, however, being made, and it is expected that at least 900 feet of dock will be completed before the closing down of the work this fall, and the entire 1,800 feet of dock is expected to be available by September, 1931. The recent summer has been the hottest in the history of Hudson Bay Railway construction. This had its effect upon the railway, and has made a good deal of additional ballasting necessary. That work also is receiving attention, and there are at the present time more than 2,000 men engaged upon either the railway or port facilities.

## New Zealand Butter

Cargoes Being Rushed To Canada Before Duty Comes Into Effect

Vancouver, B.C.—Two Pacific liners are rushing towards Vancouver cargoes of New Zealand butter, the last which will come in before the Federal Government's duty of around four cents a pound on this article, comes into effect.

The R.M.S. Abnangi has 8,277 boxes for Victoria.

On October 10 the R.M.S. Niagara will bring another consignment, the amount of which is not yet known. In this latter case heavy demand on the butter market is expected during the days between the arrival of the butter and the imposition of the tariff.

## Bootlegging Of Grain

Manitoba Pool Takes Steps To Stop Practice

Winnipeg, Man.—A determined attempt to prevent the "bootlegging" of grain by wheat pool members was stated recently when eleven interim injunctions against farmers were sought by the Manitoba Wheat Pool before Mr. Justice Donohay in chambers.

Sale of grain by pool members to non-pool purchasers is a breach of the organization's five-year contract, and constitutes what the trade calls "bootlegging."

Sixty Bushels To The Acre  
Prince Albert.—Thrashing halted by rains, reports pouring into this city indicate that for bushel per acre yield of wheat standing records have been shattered this year in many districts. R. J. Burke, White Star, and A. Chambul, of Foxford, claim to have threshed fields of Garnet which yielded 60 bushels to the acre, while Joe Guedo, of this district, reports a 55 per acre yield of Garnet.

Grat Zepelin Visits Russia  
Moscow, Russia.—The Graf Zepelin paid her first official visit to the Soviet capital, and was greeted when she landed at October field with red flags flying and bands playing patriotic airs. After a brief visit she returned to Germany again. Dr. Hugo Eckener was greeted by high Russian air officials.

May Give Up Flying  
London, England.—The Daily Herald says that Wing Commander Charles Kingsford-Smith, Australian aviator who recently flew from Europe to the United States, has abandoned his plan for a homebound flight to Australia, and has quit flying entirely on physician's orders.

W. N. U. 1855

## Wheat Crop Estimate

Federal Government Forecast Of Wheat Crop Is 384,769,000 Bushels

Ottawa, Ont.—Canada's wheat crop is estimated at 384,769,000 bushels, of which 362,000,000 bushels will be garnered in the three prairie provinces. This is the forecast made public recently by the Dominion Bureau of Statistics based on reports filed in on or about August 31.

Of the above total for all Canada 364,481,000 bushels in spring wheat. Last year's spring wheat crop totaled 284,016,000 bushels and the entire wheat crop was 304,520,000 bushels. "The western wheat crop," the report states, "is very spotty and thus difficult to estimate because of a series of deprecating weather effects from seeding until harvest."

"The crop has been favored by relative freedom from frost damage and by almost ideal weather for harvesting," the report declares. "The straw and the extended use of combines have also aided the dry season to establish a new high record for earliness and volume of grain marketed in the month of August. Inspections to date show the quality to be even above that of last year."

## Fast Automobile Journey

From Toronto To Vancouver In 95 Hours and 15 Minutes

Vancouver, B.C.—From Toronto to Vancouver by automobile in 95 hours and 15 minutes is the record achieved by two youths of Oakville, Ont. The fastest train scheduled takes 85 hours to do the same journey.

Dick Henry and Vernon Dynes left Toronto Thursday, at 11 p.m., and arrived here, Monday night, at 6:30 o'clock. They proceeded from Toronto to Sault Ste. Marie, thence across United States territory to Emerson, Minn., from there they followed the main prairie roads to Crow's Nest Pass, through the Rockies to Vancouver.

## May Return To Public Life

Humor That Hon. C. A. Dunning Will Continue To Politicize

Ottawa, Ont.—The return to public life of Hon. C. A. Dunning, former Minister of Finance, who was defeated in Regina, is still regarded as very much of a possibility.

It is suggested that R. ion, W. L. Mackenzie King, opposition leader, had Mr. Dunning in mind when he made his reference to familiar figures who were absent from the Commons, during his speech on the address from the throne.

Mr. Dunning was one of the most prominent debaters in the Liberal ranks during the last parliament.

## Steamship Breaks Record

Empress Of Japan' Makes Fast Crossing Victoria To Honolulu

Honolulu.—Breaking all records from Victoria, B.C., to Honolulu, the Canadian Pacific steamship "Empress of Japan," arrived here in four days, fifteen hours and fifty minutes for the 2,329 miles.

On her maiden voyage, the liner lowered the record between Yokohama, Japan, and Victoria to eight days, six hours and twenty-seven minutes, August 22. This trans-Pacific record had stood for seven years.

Toten Pole For President Hoover  
Baltimore.—Another gift is on the way for President Hoover's collection. It is a totem pole about a foot high, carved from a walrus tusk to be presented to him when he arrives to review the parade of the Veterans of Foreign Wars. The totem pole is the gift of Deaf Post, Anchorage, Alaska.

Nurses Have Eight Hour Day  
Ottawa, Ont.—As a measure towards relief of unemployment the board of trustees of Ottawa Civic hospital have decided to provide an eight-hour working day for nurses on the staff. Three shifts of nurses will now be employed daily in place of the present double shift of 12 hours each.

Ogopogo Still Lives

Hamilton, Ont.—Prompt action by Vernon, B.C., in broadcasting denials that Ogopogo had died a violent death, net with reward recently when the Union of Canadian municipalities voted to meet next year at the sea serpent city. Vernon delegates promised a sight of Ogopogo, and the vote was unanimous.

Sixty Bushels To Acre  
Lancaster, Sask.—The biggest crop in this district was threshed on Mrs. F. E. Spence's farm three miles north-west of town, the average for the field being 60 bushels of wheat to the acre.

## Wheat From Russia

Cargo Of Russian Wheat Is Received In Scotland

London, England.—The first example of Russia's wheat export campaign is the arrival of 7,000 quarters (a quarter equals eight bushels) of Russian wheat at Leith, in Scotland, for the Scottish Co-operative Wholesale Society.

This is said to be the first Russian consignment to Scotland since the war, and it was made in spite of the reported stringent food shortage in Russia.

## Cut-Off May Be Included

Appropriation For Winnipeg's Short Route To Bay Railway Expected

Ottawa, Ont.—Provision towards the construction of the proposed Hudson cut-off in Manitoba to the Hudson Bay Railway will probably be included in the \$20,000,000 expenditure proposed by the government on national undertakings.

It is understood that work on the short route from Winnipeg to the Hudson Bay Railway will start this fall.

## UNITED STATES MOVES TO HALT IMMIGRATION

Washington, D.C.—The state department has announced that in carrying out President Hoover's wishes for more strict application of the immigration laws to aid unemployment, conferences will be held at Winnipeg and Vancouver, in addition to three consular conferences overseas.

The Canadian conferences are set for this week and another date early in October. Foreign Service Inspector Monnett R. Davis has been designated to attend the conferences in the Dominion.

A conference at London, England, September 22 and 23 will draw the consular officers in England, Ireland and nearby points on the continent. Officers from France, Germany, Switzerland, Austria, Sweden, Italy, Czechoslovakia and Yugoslavia, will meet at Stuttgart, Germany, September 26 and 27.

A third conference for the consular officers in Poland, Finland and Latvia, completing the plans for all large immigration centres in Europe, will be held October 1 and 2, at Warsaw.

Under the president's plan, immigrants to the United States must show they will not become public charges. At present, aliens entering the country with position previously contracted for, are denied entry under the alien contract labor law.

Ottawa, Ont.—Announcement from Washington that more stringent measures are in contemplation in regard to migration to the United States was received here recently without any great degree of surprise. Unemployment in the country to the south has frequently been stated to be considerably worse than in Canada, and it was expected that steps might be taken to curtail the movement in that country.

It is generally accepted, however, that the present emigration from Canada across the border is not great enough to cause apprehension in Washington.

## "Miracle" Heroine Here.

Lady Diana Manners, famous English society beauty and equally famous heroine of "The Miracle," during its New York and Boston productions, photographed with her husband, Captain Alfred Duff Cooper, D.S.O. (left), Vancouver, Canada, and his son William Ward, at Windsor Street Station, Montreal, on her first visit to Canada. The party are on an extended trip through Canada, as far as Vancouver, with a long stay at the Nipigon Bungalow Camp. Lady Diana thought the talkies would not out the legitimate stage and observed "people still appear to be building ordinary theatres."

## MISSIONARY FROM NORTH

Rev. L. E. Atkinson, eight years a missionary among the northern Cree at Oxford House, Man., a poor one week's travel beyond the north end of Lake Winnipeg, is one of the commissioners elected to the general council of the United Church of Canada, meeting in London, Ont., in mid-September. He was born near Stouffville, Ont., and attended Victoria College, Toronto.

## Colleges For Firemen

Future Fire Fighters Will Be Specially Trained In Profession

Winnipeg, Man.—Firemen of the future will be graduates of fire colleges where they will receive highly specialized training in all phases of their profession, Chief Ralph J. Scott, president of the International Association of Fire Chiefs, declared before the first business session of the Fire Chiefs convention here. He said that during the past year he had devoted every effort to furthering the idea of the fire college endorsed by the international convention when it met last year at Birmingham, Ala. Officers of Los Angeles, Cal., Fire College—first of its kind to be organized—explained methods of instruction at the school.

## Girl Swims English Channel

Nineteen-Year-Old Maid From Africa Performs Difficult Feat

Dover, England.—Nineteen-year-old Peggy Duncan, South African girl swimmer, ranked among the few mermaids who have made the difficult swim across the English Channel, although she was balked in her purpose of beating Gertrude Ederle's time in accomplishing the feat.

Miss Duncan, who weighs 200 pounds, landed at South Foreland, England, after swimming from Cape Gris Nez, France, in 16 hours and 15 minutes. Miss Ederle's record is 14 hours and 25 minutes.

## Timber Cutting Stopped

Ottawa, Ont.—On the request of the Premier of Saskatchewan, Hon. Thomas G. Murphy, Dominion Minister of Interior, has ordered no more licenses or permits to cut railway ties, pulpwood and other timber be granted in the province of Saskatchewan, prior to October 1, next. It is on that date that the province takes over administration of its natural resources.

## Increased Population

Toronto, Ont.—The population of Toronto has increased 15,226 within the last year according to the assessment commissioners report. The total population of Toronto is 621,596.

## Canadian Ace Killed

Captain Dickie Meets Death In Accident Near Fort William

Fort William, Ont.—Captain James A. Dickie, Canadian war hero, died when his plane swooped earthward and crumpled its nose in the rough forest land ten miles from the outskirts of Fort William. Eighteen-year-old Marion Swain, who was flying with Capt. Dickie at the time of the crash, lies in hospital here in a critical condition.

Cause of the accident, witnessed by only a few persons, could not immediately be determined. It is believed that the Gypsy Moth, a machine familiar to the war ace, swung into spin from which it could not be extricated. Position of the passengers in the debris did not indicate to rescuers which one was piloting the plane when the accident occurred. Miss Swain recently obtained her student pilot's license.

Capt. Dickie, only recently named secretary of the Flying Clubs Association of Canada, was well-known among Canadian airmen. He had previously been instructor of the Fort William Flying Club. Formerly a resident of Winnipeg, he came to the lake head six years ago and operated a drug store, in Fort William. Only a few months ago he was married to Miss J. Burnett, of Fort William.

## A Golf Marvel

Consecutive Hole-in-One Title Is Received By Married Couple

Saskatoon, Sask.—Up at a little town of Waldron in northeast Saskatchewan, R. Penny and his wife lay claim to the consecutive hole-in-one title for married couples.

Mr. Penny slapped a drive from the fifth tee on the Stella course and gasped as he saw the golf ball roll into the cup. His chest was still expanding as his wife brushed him aside and teed up her ball. A swing, a smack, and the white sphere bounded toward the pin, rolled about the rim of the cup and dropped in beside its mate.

Mr. Penny says imitation is flattery's sincerest form. Mrs. Penny claims the female of the species is as deadly on the drive—as the male.

## FEDERAL PLAN TO PROVIDE WORK FOR UNEMPLOYED

Ottawa.—"Work, not charity" is the basis upon which the government is proceeding in its effort to deal with the unemployment problem. Thus declared Hon. R. B. Bennett, Prime Minister, in the House of Commons.

Before the House in committee, the Premier explained the government's proposals for spending the \$20,000,000 which he is asking parliament to vote. These include building of public works, such as wharves, bridges, etc., which are national undertakings but which would not of necessity have been started immediately except to relieve the present situation.

It is proposed to assist the provinces in connecting up the unfinished portions of the trans-Canada highway, and in this connection the prime minister suggested that assistance might also be given out of the Federal treasury for the maintenance of highways connecting provinces.

The railway companies have been asked to inform the government what works they can undertake. Mr. Bennett stated, and assistance would be decided upon in relation to the cost of such undertakings. The question of the Peace River outlet will be left over, he said, until the next session of parliament, which would be called soon after the new year.

The Dominion government will deal directly with the provinces in its assistance to public works of a provincial or municipal nature, and also in granting one-third of the amount expended in cases where municipalities have to provide relief other than that of giving employment.

The amendments to the customs act respecting dumping are expected to receive considerable employment situation by giving employment in a few weeks, Mr. Bennett hoped, to some 25,000 men now out of work.

Information received from the various provinces of Canada indicates that there are now 117,000 people out of work in the Dominion. There is a prospect that this number may be increased to 177,000 during the coming winter.

Mr. Bennett gave the above figures indicative of the scope of the unemployment problem in the Dominion.

## BRAND MAKES STRONG PLEA FOR A UNITED EUROPE

Geneva, Switzerland.—Aristide Briand, French foreign minister, turned his idea for a federation of European states to the assembly of the League of Nations in an atmosphere of warm admiration for himself and friendly sympathy for the principle of European collaboration.

In his address he attempted n-plotage, or directing, but left it to the nations themselves to establish its definite form. He contented himself with arguing the necessity of some closer federal bond between the states of the old continent, and in asserting emphatically that neither the League of Nations, the United States, nor any other legitimate regional or international grouping would find it inimical.

It was regarded as likely the plan as outlined in M. Briand's memorandum of May 17, to the various nations and the responses of the powers will be submitted to a committee for study and action. M. Briand recalled that when he first laid the idea before the world he had insisted his proposed federation must be within the framework of the League of Nations. He repeated today that it must rest there.

"We have the unhappiness to inhabit a continent that has suffered a great disaster," he said. "Is there something that can be done for peace? Can these people organize to prevent war?"

He said that he knew and realized it would be difficult always to found a union among people so different, but that real good-will would find a solution.

He declared that the union would run counter to or be in any way inimical to the United States. Statesmen had told him on the other hand, he declared, that relations between Europe and America could more easily be strengthened by existence of a European organization.

"Twenty-seven nations have studied this question," he concluded. "Twenty-seven nations have said 'Yes it can be done.' There it is before you. Go. March on. Accomplish peace."

## Would Use Domestic Coal

Efforts To Be Made To Utilize Canadian Coal For Home Markets

Ottawa, Ont.—Efforts to ensure Canadian coal will be utilized to the fullest extent possible are being made by the government. In the House of Commons, Premier R. B. Bennett stated that the government hoped to make some arrangement that would ensure the utilization of Alberta, Saskatchewan and British Columbia coal in Canada.

The prime minister stated that subsidies given in connection with the transportation of Canadian coal had lapsed. Negotiations, however, were under way for the purpose of ensuring the utilization of Canadian coal.

## Grain Exports From Vancouver Higher

August Shipments Reported To Be Higher Than Any Recorded

Vancouver, B.C.—Grain exported from Vancouver during the month of August totalled 2,933,519 bushels, almost 600,000 bushels more than was exported in August, 1928, when grain shipments reached a peak of 55,000,000 bushels from this port.

Last month export to the Orient totalled 550,732 bushels, compared with 680,221 bushels in August two years ago.

## Starving Boys Steal Biscuits

Montreal, Que.—Unable to buy food, three boys took three boxes of soda biscuits from a local grocery store. They were arrested and turned over to the juvenile court. The youths told police they had not had a proper meal for a month and were starving. A visit to their homes showed squalor and starvation.

## Rumanian Heads League

Geneva, Switzerland.—The 11th assembly of the League of Nations elected Michalos Titulescu as its president. M. Titulescu has been Rumanian minister at St. James. The vote was 46 for M. Titulescu out of 50 valid votes. Names and votes of other candidates were not announced.

## To Meet In Boston

Houston, Tex.—The 1931 convention of the International Typographical Union will be held at Boston. It was decided at the 97th annual convention here.

## Personal and Local

Mrs. H. T. Halliwell is visiting friends at Creston for a few days.

John Denholm, who was injured several weeks ago in McGillivray mine, is still a patient in the hospital.

J. Morency of Blairmore has purchased a launch formerly in use on Waterton Lake and this week had it transported by motor truck to Crow's Nest Lake. Its journey through the Pass excited considerable interest.

Fred Turnbull, business manager of the Red Deer Advocate, was a business visitor to Lethbridge last week. Mr. Turnbull is well known in Cranbrook, having worked on the Cranbrook Herald some 25 years ago, when it was operated under very adverse conditions, from the mechanical point of view. He was one of those printers who was at times compelled to furnish power from the trestle of a platen press to keep the Monoline type setting machine in operation. He was also an adept at carrying 8-point quads in his pocket, leaving the rest of the staff short of spacing material on numerous and sundry occasions. He was the only printer of approximately one hundred who over a period of years held various positions on the Herald who did not drink whiskey, smoke rope cigars and swear.—Courier.

### Examination Results, June 1930

(Continued from Page Five)

dent of only average or a little less than average ability persists, (with or without the knowledge and support of his parents) in competing out of his class, the best the principal and staff can do is to express the hope that this 'average' student will do something that (as the records show) has never been done before.

It is perhaps difficult for those not in close touch with the organization of the modern type of specialized high school to understand the difficulty of 'fitting in' referred to above. Those interested, particularly the parents of high school students, should call and discuss the matter with the principal. (Continued Next Week)

FOR SALE—Dominion Heater, practically new, also a number of fruit sealers. Apply to W. Stevenson, sixth street.
